

THE FBR FUNDS

FBR Technology Fund

**Supplement Dated December 22, 2008
to the Prospectus dated February 28, 2008**

IMPORTANT NOTICE REGARDING CHANGE IN PRINCIPAL INVESTMENT STRATEGY

On October 23, 2008, the Board of Trustees of the FBR Technology Fund (the “Fund”) approved a change to the Fund’s principal investment strategy to remove the requirement that the Fund invest in the securities of large capitalization companies, defined as those companies with market capitalizations of \$3 billion or more. The change will become effective on February 28, 2009 and at that time the Fund may invest in the securities of technology companies without regard to market capitalization.

Accordingly, the following replaces in its entirety the section entitled “Principal Investment Strategy” and “Risks” on page 9 and 10 of the Prospectus:

Principal Investment Strategy

Under normal market conditions, the Technology Fund invests at least 80% of its net assets plus the amount of any borrowings for investment purposes in securities of companies that are principally engaged in the research, design, development, manufacturing or distributing products or services in the technology industry. The Fund’s policy of investing at least 80% of its net assets in companies principally engaged in technology may only be changed upon 60 days notice to shareholders. The Fund will primarily invest in equity securities (which include common stocks, preferred stocks, warrants and other securities convertible into common stocks, including convertible bonds and convertible preferred stock) of companies listed on a U.S. securities exchange or NASDAQ that are expected to experience growth as a result of technology. Potential investments would include, but not be limited to, the following industries: computer software and hardware, semiconductors, scientific instrumentation, telecommunications, pharmaceuticals, chemicals, synthetic materials, defense and commercial electronics, data storage and retrieval, biotechnology, and healthcare and medical supplies. While the Fund’s investments will primarily be in domestic U.S. securities, the Fund’s investments may include foreign securities, including indirect investments such as ADRs or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations.

The Adviser makes investment decisions for the Fund on the basis of fundamental security analysis. Once an issuer is identified as an attractive candidate for the Fund’s portfolio, the Adviser assesses the relative value and growth potential of the security on the basis of various factors, which may include price to book ratio, price to earnings ratio, earnings yield and cash flow, among others. The Fund may invest to a limited degree in securities issued in initial public offerings (“IPOs”).

Many of the common stocks purchased by the Fund will not pay dividends; instead, stocks will be bought for the potential that their prices will increase and provide capital appreciation for the Fund.

Risks

The Technology Fund is intended for investors who are seeking above-average gains and are willing to accept the risks of concentrating their investments in securities within an industry or group of industries. Because of its narrow industry focus, the performance of the Fund is tied closely to and is affected by developments in the technology industry and its related businesses. The value of the Fund's shares may fluctuate more than shares of a fund investing in other industries or in a broader range of industries.

To the extent the Fund invests in IPOs, it will be subject to certain risks because companies involved in IPOs generally have limited operating histories, and prospects for future profitability are uncertain. Prices of IPOs may also be unstable because of the absence of a prior public market, the small number of shares available for trading, and limited investor information.

Small-cap and mid-cap companies may offer greater potential for capital appreciation, but they also involve greater risk of loss and price fluctuation. The trading markets for securities of small-cap and mid-cap issuers may be less liquid and more volatile than securities of larger companies. More information regarding the risks involved with investing in the Fund can be found in the "Further Discussion of Risks" section of this Prospectus.

Supplement Dated June 11, 2008
to the Prospectus and Statement of Additional Information dated February 28, 2008

NOTICE REGARDING NEW NAME OF SHARE CLASS

Effective May 30, 2008, certain of the above Funds began offering new share classes: R Class shares intended for retirement investors and I Class shares intended for institutional investors. The initial class of shares (the share class you own) will now be referred to as Investor Class. No other changes have been made. Reports and other materials you will receive from the Funds in the near future will refer to your share class as Investor Class. Should you wish to receive information on the other share classes please call 888.200.4710.

The following information replaces the information under the section entitled, “FEES AND EXPENSES” on page 24 thru 26.

Annual Fund Operating Expenses (expenses that are deducted from Fund assets)

	Pegasus Fund	Pegasus Mid Cap Fund	Pegasus Small Cap Fund	Pegasus Small Cap Growth Fund
Advisory Fees	0.90%	0.90%	0.90%	0.90%
Distribution (12b-1) Fees	0.25%	0.25%	0.25%	0.25%
Other Expenses ¹	1.06%	3.02%	2.62%	2.66%
Total Annual Fund Operating Expenses	2.21%	4.17%	3.77%	3.81%
Fee Waiver and Expense Reimbursement ²	(0.96)%	(2.82)%	(2.32)%	(2.36)%
NET EXPENSES ²	1.25%	1.35%	1.45%	1.45%

	Focus Fund	Large Cap Financial Fund	Small Cap Financial Fund	Technology Fund	Gas Utility Index Fund
Advisory Fees	0.90%	0.90%	0.90%	0.90%	0.40%
Distribution (12b-1) Fees	0.25%	0.25%	0.25%	0.25%	NA
Other Expenses ¹	0.25%	0.77%	0.36%	0.55%	0.35%

Total Annual Fund Operating Expenses	1.40%	1.92%	1.51%	1.70%	0.75%
Fee Waiver and Expense Reimbursement ²	-	(0.03)%	-	-	—
NET EXPENSES ²	1.40%	1.89%	1.51%	1.70%	0.75%

¹ Other expenses are based on amounts for the Fund's current fiscal year and include fees paid to intermediaries such as banks, broker-dealers, financial advisors or other financial institutions for administration, sub-transfer agency and other services associated with shareholders whose shares are held of record in omnibus accounts or other types of group accounts. For more information regarding administrative fees, see the following section entitled "Fund Management." Other expenses may fluctuate from year to year based on Fund's investment operations and asset size.

² Effective May 30, 2008, FBR Fund Advisers, Inc. has agreed in writing to waive a portion of its investment advisory fees and assume certain expenses of each Fund to the extent annual fund operating expenses exceed 1.25%, 1.35%, 1.45% and 1.45% of the Pegasus Fund, Pegasus Mid Cap Fund, Pegasus Small Cap Fund and Pegasus Small Cap Growth Fund, respectively and 1.95% of the Focus Fund, Large Cap Financial Fund, Small Cap Financial Fund and Technology Fund's average daily net assets (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses, extraordinary legal expenses, or any other extraordinary expenses), except the Gas Utility Index Fund. With respect to the Gas Utility Index Fund, the Adviser has agreed in writing to waive a portion of its investment advisory fees and assume certain expenses of the Fund to the extent annual fund operating expenses exceed 0.85% of the Fund's average daily net assets (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses, extraordinary legal expenses, or any other extraordinary expenses). The Adviser has agreed to maintain these expense limitations with regard to each Fund through October 31, 2011. The Adviser may recoup any waived amount from a Fund pursuant to this agreement if such reimbursement does not cause the Fund to exceed existing expense limitations and the reimbursement is made within three years after the year in which the Adviser incurred the expense.

Examples

These examples are intended to help you compare the cost of investing in the Investor Class shares of the Funds with the cost of investing in other mutual funds.

These examples assume that you invest \$10,000 in each Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year and that the Funds' operating expenses remain the same.** Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 YEAR	3 YEARS	5 YEARS	10 YEARS
Pegasus Fund	\$127	\$394	\$892	\$2,277
Pegasus Mid Cap Fund	137	420	1,306	3,625
Pegasus Small Cap Fund	148	452	1,262	3,408
Pegasus Small Cap Growth Fund	148	452	1,269	3,433
Focus Fund	143	443	766	1,680
Large Cap Financial Fund	192	600	1,034	2,241
Small Cap Financial Fund	154	477	824	1,802
Technology Fund	173	536	923	2,009
Gas Utility Index Fund	77	240	417	930

** The examples above assume that the expense limitation agreement will continue only through October 31, 2011, the end of its current term.

PLEASE RETAIN THIS SUPPLEMENT FOR YOUR FUTURE REFERENCE.

INVESTMENT OBJECTIVES, PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

FBR PEGASUS FUND™ (FBRPX)

OBJECTIVE. The investment objective of the Pegasus Fund is capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Pegasus Fund invests primarily in common stocks that, in the opinion of the Fund's investment adviser, FBR Fund Advisers, Inc. (the "Adviser"), offer the potential for capital appreciation. The Adviser invests in the stocks of companies of any size without regard to market capitalization.

When evaluating securities to purchase, the Adviser will make investment decisions for the Fund on the basis of fundamental security analysis. Once an issuer is identified as an attractive candidate for the Fund's portfolio, the Adviser assesses the relative value and growth potential of the security on the basis of various factors, which may include price to book ratio, price to earnings ratio, earnings yield, leverage and cash flow, among others.

Although the Fund invests primarily in common stocks, it may purchase preferred stocks, warrants and convertible bonds. While the Fund's investments are primarily in domestic U.S. securities, the Fund's investments may include foreign securities, including indirect investments such as American Depositary Receipts ("ADRs") or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations.

RISKS. The Pegasus Fund is intended for investors who are seeking above-average gains. Investing in the Fund involves the risk of investing in small capitalization ("small-cap") and mid capitalization ("mid-cap") companies, which generally involve greater risk than investing in larger, more established companies. Small- and mid-cap may offer greater potential for capital appreciation, but they also involve greater risk of loss and price fluctuation. The trading markets for securities of small-cap and mid-cap issuers may be less liquid and more volatile than securities of larger companies. More information regarding the risks involved with investing in the Fund can be found in the "Further Discussion of Risks" section of this Prospectus.

FBR PEGASUS MID CAP FUND™ (FBRMX)

OBJECTIVE. The investment objective of the Pegasus Mid Cap Fund is capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Fund invests at least 80% of its net assets plus the amount of any borrowings for investment purposes in securities of mid-cap companies. The Fund's policy of investing at least 80% of its net assets in mid-cap companies may only be changed upon 60 days notice to shareholders. The Fund considers mid-cap companies to have market capitalizations of greater than \$2 billion and less than \$15 billion at the time of purchase. The Fund may invest up to 20% of its net assets in equity securities of companies with smaller or larger market capitalizations.

When evaluating securities to purchase, the Adviser makes investment decisions for the Fund on the basis of fundamental security analysis. Once an issuer is identified as an attractive candidate for the Fund's portfolio, the Adviser assesses the relative value and growth potential of the security on the basis of various factors, which may include price to book ratio, price to earnings ratio, earnings yield, leverage and cash flow, among others.

Although the Fund invests primarily in common stocks, it may purchase preferred stocks, warrants and convertible bonds. While the Fund's investments are primarily in domestic U.S. securities, the Fund's investments may include foreign securities, including indirect investments such as ADRs or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations.

The Fund's investments focus on companies that have a demonstrated record of achievement and excellent prospects for earnings and/or cash flow growth over a 3- to 5-year period.

RISKS. Investing in the Pegasus Mid Cap Fund involves the risks of investing in mid-cap companies, which generally involve greater risk than investing in larger, more established companies. Generally, there is less publicly available information concerning mid-cap companies than for larger more established companies. Mid-cap companies are typically subject to greater changes in earnings and business prospects than larger, more established companies and the market prices of the securities of mid-cap companies may be more volatile. Additionally, because mid-cap companies have fewer shares outstanding than larger companies, it also may be more difficult to buy or sell significant amounts of such shares without unfavorable impact on prevailing prices. More information regarding the risks involved with investing in the Fund can be found in the "Further Discussion of Risks" section of this Prospectus.

FBR PEGASUS SMALL CAP FUND™ (FBRYX)

OBJECTIVE. The investment objective of the Pegasus Small Cap Fund is capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Fund invests at least 80% of its net assets plus the amount of any borrowings for

investment purposes in securities of small-cap companies. The Fund's policy of investing at least 80% of its net assets in small-cap companies may only be changed upon 60 days notice to shareholders. The Fund considers small-cap companies to have market capitalizations of less than \$3 billion, measured at the time of purchase. The Fund may invest up to 20% of its net assets in equity securities of companies with larger market capitalizations.

When evaluating securities to purchase, the Adviser makes investment decisions for the Fund on the basis of fundamental security analysis. Once an issuer is identified as an attractive candidate for the Fund's portfolio, the Adviser assesses the relative value and growth potential of the security on the basis of various factors, which may include price to book ratio, price to earnings ratio, earnings yield, leverage and cash flow, among others.

Although the Fund invests primarily in common stocks, it may purchase preferred stocks, warrants and convertible bonds. While the Fund's investments are primarily in domestic U.S. securities, the Fund's investments may include foreign securities, including indirect investments such as ADRs or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations.

The Fund's investments focus on companies that have a demonstrated record of achievement and excellent prospects for earnings and/or cash flow growth over a 3- to 5-year period.

RISKS. Investing in the Pegasus Small Cap Fund involves the risks of investing in small-cap companies, which generally involve greater risk than investing in larger, more established companies. Generally, there is less publicly available information concerning small-cap companies than for larger more established companies. Small-cap companies are typically subject to greater changes in earnings and business prospects than larger, more established companies and the market prices of the securities of small-cap companies may be more volatile. Additionally, because small-cap companies have fewer shares outstanding than larger companies, it also may be more difficult to buy or sell significant amounts of such shares without unfavorable impact on prevailing prices. More information regarding the risks involved with investing in the Fund can be found in the "Further Discussion of Risks" section of this Prospectus.

FBR PEGASUS SMALL CAP GROWTH FUND™ (FBRGX) **(formerly known as FBR Small Cap Technology Fund)**

OBJECTIVE. The investment objective of the Pegasus Small Cap Growth Fund is long-term capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Pegasus Small Cap Growth Fund invests at least 80% of its net assets plus the amount

of any borrowings for investment purposes in securities of small-cap companies. The Fund's policy of investing at least 80% of its net assets in small-cap companies may only be changed upon 60 days notice to shareholders. The Fund currently considers small-cap companies to be those companies with market capitalizations of less than \$3 billion dollars, measured at the time of purchase. The Fund primarily invests in equity securities (which include common stocks, preferred stocks, warrants and other securities convertible into common stocks, including convertible bonds and convertible preferred stock) of small-cap companies listed on a U.S. securities exchange or NASDAQ expected to experience earnings growth. While the Fund's investments will primarily be in domestic U.S. securities, the Fund's investments may include foreign securities, including indirect investments such as ADRs or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations. The Fund may invest up to 20% of net assets in equity securities of companies with larger market capitalizations.

The Adviser makes investment decisions for the Fund on the basis of fundamental security analysis. Once an issuer is identified as an attractive candidate for the Fund's portfolio, the Adviser assesses the relative value and growth potential of the security on the basis of various factors, which may include price to book ratio, price to earnings ratio, earnings yield and cash flow, among others. The Fund may invest to a limited degree in securities issued in IPOs.

Many of the common stocks in which the Fund invests do not pay dividends; instead, stocks are bought for the potential that their prices will increase and provide capital appreciation for the Fund.

RISKS. Investing in the Pegasus Small Cap Growth Fund involves the risks of investing in small-cap companies, which generally involve greater risk than investing in larger, more established companies. Generally, there is less publicly available information concerning small-cap companies than for larger, more established companies. Small-cap companies are typically subject to greater changes in earnings and business prospects than larger, more established companies and the market prices of the securities of small-cap companies may be more volatile. Additionally, because small-cap companies have fewer shares outstanding than larger companies, it also may be more difficult to buy or sell significant amounts of such shares without unfavorable impact on prevailing prices.

To the extent the Fund invests in IPOs, it will be subject to certain risks because companies involved in IPOs generally have limited operating histories, and prospects for future profitability are uncertain. Prices of IPOs may also be unstable because of the absence of a prior public market, the small number of shares available for trading, and limited investor information. More information regarding the risks involved with investing in the Fund can be found in the "Further Discussion of Risks" section of this Prospectus.

FBR FOCUS FUND (FBRVX) **(formerly known as FBR Small Cap Fund)**

OBJECTIVE. The investment objective of the Focus Fund is capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Focus Fund invests primarily in securities of companies traded in domestic markets. Investments will consist primarily of common stocks, but may include preferred stocks, warrants, options, equity-like instruments and debt instruments.

The Fund is sub-advised by Akre Capital Management, LLC (“ACM”). ACM implements the Fund’s strategy by focusing on companies whose valuations in the market are modest and that earn higher than average returns on shareholders’ equity, are managed by individuals who have a history of treating public shareholders like partners, and have ample opportunity to reinvest excess profits at above average rates. Once a potential investment is identified, ACM attempts to purchase shares at a price it believes represents a discount to a conservative estimate of the company’s intrinsic value.

The Fund may from time to time hold a significant portion of its portfolio in cash or cash equivalent instruments. If market conditions reduce the availability of securities with acceptable valuations, the Fund may, for extended periods, hold larger than usual cash reserves until securities with acceptable valuations become available. During rising markets, holding larger than usual cash reserves may be detrimental to the Fund’s performance. During declining markets, holding larger than usual cash reserves may allow the Fund to purchase securities at a discount.

RISKS. Investing in the Focus Fund involves the risks of investing in small- and mid-cap companies, which generally involve greater risk than investing in larger, more established companies. Generally, there is less publicly available information concerning small- and mid-cap companies than for larger more established companies. Small- and mid-cap companies are typically subject to greater changes in earnings and business prospects than larger, more established companies and the market prices of the securities of small-cap companies may be more volatile. Additionally, because small- and mid-cap companies have fewer shares outstanding than larger companies, it also may be more difficult to buy or sell significant amounts of such shares without unfavorable impact on prevailing prices. More information regarding the risks involved with investing in the Fund can be found in the “Further Discussion of Risks” section of this Prospectus.

FBR LARGE CAP FINANCIAL FUND (FBRFX)

OBJECTIVE. The investment objective of the Large Cap Financial Fund is capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Large Cap Financial Fund invests at least 80% of its net assets plus the amount of any borrowings for investment purposes in securities of large capitalization (“large-cap”) companies “principally engaged” in the business of financial services including, but not limited to, commercial banks, savings and loan associations, consumer and industrial finance companies, securities brokerage companies, insurance companies, real estate and leasing companies, holding companies for each of the foregoing types of business, or companies that combine some or all of these businesses. The Fund’s policy of investing at least 80% of its net assets in large-cap companies principally engaged in financial services may only be changed upon 60 days notice to shareholders. The Fund considers a large-cap company to be one that has a market capitalization of \$3 billion or more, measured at the time of purchase. An issuer is “principally engaged” in the business of providing financial services if at least 50% of its assets, gross income, or net profits are committed to, or derived from, financial services activities. The Fund may also invest in companies in the information technology industries that primarily provide products and/or services to companies in the financial services group of industries. The Fund may invest up to 20% of its net assets in companies outside of the financial group of industries. Investments will consist primarily of common stocks, but may include preferred stocks, warrants and convertible bonds.

When evaluating securities to purchase, the Adviser generally looks for companies that have low price-to-earnings ratios and low price-to-book ratios relative to the financial services group of industries.

The Fund will not invest more than 5% of its total assets in the equity-related securities of any one company that derives more than 15% of its revenues from brokerage or investment management activities.

RISKS. The Large Cap Financial Fund is intended for investors who are seeking above-average gains and are willing to accept the risks of concentrating their investments within a group of industries. Because of its narrow industry focus, the performance of the Fund is tied closely to and affected by developments in the financial services group of industries, such as the possibility that government regulation will negatively impact companies involved in the financial services group of industries. Financial services companies can be influenced by adverse effects of volatile interest rates and other factors. More information regarding the risks involved with investing in the Fund can be found in the “Further Discussion of Risks” section of this Prospectus.

FBR SMALL CAP FINANCIAL FUND (FBRSX)

OBJECTIVE. The investment objective of the Small Cap Financial Fund is capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Small Cap Financial Fund invests at least 80% of its net assets plus the amount of any borrowings for investment purposes in securities of small-cap companies “principally engaged” in the business of providing financial services to consumers and industry. The Fund’s policy of investing at least 80% of its net assets in small-cap companies principally engaged in financial services may only be changed upon 60 days notice to shareholders. The Fund considers a small-cap company to be one that has a market capitalization of less than \$3 billion, measured at the time of purchase. An issuer is “principally engaged” in the business of providing financial services if at least 50% of its assets, gross income, or net profits are committed to, or derived from, financial services activities. The Fund focuses on financial services companies that invest in real estate, usually through mortgages and other consumer-related loans. These companies may also offer other financial services such as discount brokerage services, insurance products, leasing services, and joint venture financing. Investments may include mortgage banking companies, consumer finance companies, savings and loan associations, savings banks, building and loan associations, cooperative banks, commercial banks, other depository institutions, companies in the information technology industries which are primarily engaged in providing products and/or services to the types of companies listed above, and real estate investment trusts (“REITs”). The Fund may invest up to 20% of its net assets in companies outside of the financial services group of industries. Investments will consist primarily of common stocks, but may include preferred stocks, warrants and convertible bonds.

When evaluating securities to purchase, the Adviser generally looks for companies that have low price-to-earnings ratios and low price-to-book ratios relative to the financial services group of industries.

The Fund will not invest more than 5% of its total assets in the equity-related securities of any one company that derives more than 15% of its revenues from brokerage or investment management activities.

RISKS. The Small Cap Financial Fund is intended for investors who are seeking above-average gains and are willing to accept the risks of concentrating their investments within a group of industries. Because of its narrow industry focus, the performance of the Fund is tied closely to and affected by developments in the financial services group of industries, such as the possibility that government regulation will negatively impact companies involved in the financial services group of industries. Financial services companies can be influenced by adverse effects of volatile interest rates, and other factors.

Investing in the Fund also involves the risks of investing in small-cap companies, which generally involve greater risk than investing in larger, more established companies. Generally, there is less publicly available information concerning small-cap

companies than for larger more established companies. Small-cap companies are typically subject to greater changes in earnings and business prospects than larger, more established companies and the market prices of the securities of small-cap companies may be more volatile. Additionally, because small-cap companies have fewer shares outstanding than larger companies, it also may be more difficult to buy or sell significant amounts of such shares without unfavorable impact on prevailing prices. More information regarding the risks involved with investing in the Fund can be found in the “Further Discussion of Risks” section of this Prospectus.

FBR TECHNOLOGY FUND (FBRTX) **(formerly known as FBR Large Cap Technology Fund)**

OBJECTIVE. The investment objective of the Technology Fund is long-term capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Under normal market conditions, the Technology Fund invests at least 80% of its net assets plus the amount of any borrowings for investment purposes in securities of large-cap companies that are principally engaged in the research, design, development, manufacturing or distributing products or services in the technology industry. The Fund’s policy of investing at least 80% of its net assets in large-cap companies principally engaged in technology may only be changed upon 60 days notice to shareholders. The Fund considers a large-cap company to be one that has a market capitalization of \$3 billion or more, measured at the time of purchase. The Fund will primarily invest in equity securities (which include common stocks, preferred stocks, warrants and other securities convertible into common stocks, including convertible bonds and convertible preferred stock) of large-cap companies listed on a U.S. securities exchange or NASDAQ that are expected to experience earnings growth as a result of technology. The Fund may invest up to 20% of its net assets in companies with small to mid-sized capitalization with above average growth prospects. Potential investments would include, but not be limited to, the following industries: computer software and hardware, semiconductors, scientific instrumentation, telecommunications, pharmaceuticals, chemicals, synthetic materials, defense and commercial electronics, data storage and retrieval, biotechnology, and healthcare and medical supplies. While the Fund’s investments will primarily be in domestic U.S. securities, the Fund’s investments may include foreign securities, including indirect investments such as ADRs or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations.

The Adviser makes investment decisions for the Fund on the basis of fundamental security analysis. Once an issuer is identified as an attractive candidate for the Fund’s portfolio, the Adviser assesses the relative value and growth potential of the security on the basis of various factors, which may include price to book ratio,

price to earnings ratio, earnings yield and cash flow, among others. The Fund may invest to a limited degree in securities issued in initial public offerings (“IPOs”).

Many of the common stocks purchased by the Fund will not pay dividends; instead, stocks will be bought for the potential that their prices will increase and provide capital appreciation for the Fund.

RISKS. The Technology Fund is intended for investors who are seeking above-average gains and are willing to accept the risks of concentrating their investments in securities within an industry or group of industries. Because of its narrow industry focus, the performance of the Fund is tied closely to and is affected by developments in the technology industry and its related businesses. The value of the Fund’s shares may fluctuate more than shares of a fund investing in other industries or in a broader range of industries.

To the extent the Fund invests in IPOs, it will be subject to certain risks because companies involved in IPOs generally have limited operating histories, and prospects for future profitability are uncertain. Prices of IPOs may also be unstable because of the absence of a prior public market, the small number of shares available for trading, and limited investor information. More information regarding the risks involved with investing in the Fund can be found in the “Further Discussion of Risks” section of this Prospectus.

FBR GAS UTILITY INDEX FUND (GASFX)

OBJECTIVE. The investment objective of the Gas Utility Index Fund is income and capital appreciation.

PRINCIPAL INVESTMENT STRATEGY. Designed as an index fund, the Gas Utility Index Fund intends to provide investment results that replicate the performance of the American Gas Association Stock Index (“Index”), an index maintained by the American Gas Association (“A.G.A.”), a national trade association of natural gas companies. The Index consists of approximately 70 publicly traded companies, both domestic and foreign, of natural gas distribution, gas pipeline, diversified gas, and combination gas and electric companies whose securities are traded on a U.S. securities exchange (exclusive of treasury stock). While the Fund’s investments will primarily be in domestic U.S. securities, the Fund’s investments may include foreign securities, including indirect investments such as ADRs or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations. The stocks included in the Fund are chosen solely on the statistical basis of their weightings in the Index.

The Fund intends to invest under normal circumstances at least 85% of its net assets in the common stock of companies that have natural gas distribution and transmission operations. No attempt is made to manage the Fund’s portfolio actively

in the traditional sense by using economic, financial or market analysis; nor will the adverse financial situation of a company directly result in its elimination from the Fund's portfolio unless the company is removed from the Index. The percentage of the Fund's assets to be invested in each company's stock contained within the Index is approximately the same as the percentage the stock represents in the Index. Each stock's proportion of the Index is based on that stock's market capitalization, that is, the number of shares outstanding multiplied by the market price of the stock. Such computation is also weighted to reduce the effect of assets not connected with natural gas distribution and transmission revenue. To avoid deviation in the Fund's performance from the Index, the Fund will seek to invest substantially all of its assets in the stocks of the Index. Although there is no predetermined acceptable range of deviation between the performance of the Index and that of the Fund, the Fund attempts to achieve a correlation of approximately 95% or better between its total return and that of the Index. One-hundred percent correlation would mean the total return of the Fund's assets would increase and decrease exactly the same as the Index. If a deviation occurs, it may be the result of various expenses incurred by the Fund, such as management fees, transaction costs and other operating expenses.

RISKS. The Gas Utility Index Fund is intended for investors who are willing to accept the risks of concentrating their investments within a group industry. Because of its narrow industry focus, the Fund's performance is tied closely to and affected by developments in the natural gas distribution and transmission industry, such as competition and weather. The gas industry is also sensitive to increased interest rates because of the industry's capital intensive nature. In the event the Fund experiences significant purchase and/or redemption requests, it may have difficulty providing investment results that replicate the Index. More information regarding the risks involved with investing in the Fund can be found in the "Further Discussion of Risks" section of this Prospectus.

STRATEGIES OF ALL FUNDS

TEMPORARY DEFENSIVE POSITIONS. The Funds may, from time to time, take temporary defensive positions in response to adverse market, economic, political or other conditions. To the extent the assets of a Fund are invested in temporary defensive positions, such Fund may not achieve its investment objective. For temporary defensive purposes, each Fund may invest in cash and/or short-term obligations. These may include high-grade liquid debt securities such as variable amount master demand notes, commercial paper, certificates of deposit, bankers' acceptances, repurchase agreements and U.S. Government obligations. The Funds may also hold these obligations in anticipation of share redemptions or pending investment of assets in accordance with each Fund's investment policies.

PORTFOLIO TURNOVER. Although each Fund generally invests for long-term capital appreciation, each Fund may, from time to time, engage in short-term trading.

Short-term trading refers to the practice of selling securities held for a short time, ranging from several months to less than a day. The objective of short-term trading is to take advantage of what the Adviser believes are changes in a market, industry or individual company. Short-term trading increases a Fund's transaction costs, which could affect the Fund's performance, and could result in higher levels of taxable realized gains to shareholders. To the extent such gains are deemed to be short-term capital gains, they will generally be taxed as ordinary income.

FURTHER DISCUSSION OF RISKS

Loss of money is a risk of investing in any of the Funds. The net asset value of each Fund can be expected to change daily and you may lose money. As with any mutual fund, there is no guarantee that any of the Funds' performance will be positive over any period of time, either short-term or long-term. Also, an investment in the Funds is not a deposit of any bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Because each Fund invests primarily in equity securities, fluctuations in the stock market in general, as well as in the value of particular equity securities held by the Funds, can affect each Fund's performance. The value of equity securities will fluctuate due to many factors, including the past and predicted earnings of the issuer, the quality of the issuer's management, general market conditions, the forecasts for the issuer's industry and the value of the issuer's assets. Holders of equity securities only have rights to value in the company after all the debts have been paid, and they could lose their entire investment in a company that encounters financial difficulty. Your investment in the Funds is not guaranteed.

INDUSTRY CONCENTRATION. Because of their narrow focus, the performance of the Large Cap Financial Fund and the Small Cap Financial Fund ("Financial Funds"), the Technology Fund, the Pegasus Small Cap Growth Fund and the Gas Utility Index Fund are tied closely to and affected by the financial services, technology, and natural gas distribution and transmission industries, respectively. The value of the Funds may be subject to greater volatility than funds with portfolios that are less concentrated. If securities in a particular industry fall out of favor, these Funds could underperform funds that focus on other types of companies. As is the case with other industries, or groups of closely-related industries, companies in the financial services, technology, and natural gas distribution and transmission industries often face similar obstacles, issues or regulatory burdens. Consequently, securities of these industries may react similarly and move in unison to changes in market conditions. Additional risks in each industry are discussed below.

Financial Services Group of Industries (Financial Funds). Companies involved in the financial services group of industries face special risks, including the negative impact of government regulation and volatile interest rates.

A Fund may incur a loss on an investment in the securities issued by these institutions. For example, banks, savings and loan associations, and finance companies are subject to extensive governmental regulation that may limit their lending activity. Commercial banks, savings and loan institutions and their holding companies are also influenced by adverse effects portfolio concentrations in loans to particular businesses, such as real estate and energy, and competition from new entrants in their areas of business. However, neither federal insurance of deposits nor regulation of the banking and savings and loan industries ensures the solvency or profitability of commercial banks or savings and loan institutions. In addition, these companies largely depend on the availability and cost of capital funds for their profitability, which can change significantly when interest rates change. In addition, general economic conditions are important to the operations of these companies.

Investment banking, securities and commodities brokerage and investment advisory companies are also subject to governmental regulation and investments in those companies are subject to the risks related to securities and commodities trading and securities underwriting activities. Insurance companies are also subject to extensive governmental regulation, including the imposition of maximum rate levels, which may be inadequate for some lines of business. The performance of insurance companies will be affected by interest rates, severe competition in the pricing of services, claims activities, marketing competition and general economic conditions.

Technology Industry (Technology Fund and Pegasus Small Cap Growth Fund). Companies in the technology industry face special risks. For example, the industry faces such challenges as rapid changes in technology, availability of capital, costs of research and development, government regulation and relatively high risks of obsolescence caused by scientific and technological advances. In addition, the technology sector is subject to the risk of aggressive product prices due to competitive pressure from numerous market entrants. Therefore, the value of such companies is particularly vulnerable to abrupt or erratic movements. These price movements may have a larger impact on the Technology Fund and the Pegasus Small Cap Growth Fund than on a fund with a more broadly diversified portfolio.

Natural Gas Industry (Gas Utility Index Fund). One of the natural gas industry's primary risks is the competitive risk associated with the prices of alternative fuels, such as coal and oil. For example, major gas customers such as industrial users and electric power generators often have the ability to switch between the use of coal, oil or gas. During periods when competing fuels are less expensive, the revenues of gas utility companies may decline with a corresponding impact on earnings. Weather is another risk that may

affect the industry; a warmer winter could decrease the amount of gas used by heating customers and thereby reduce the earnings of companies in the industry. Additionally, the gas industry is also sensitive to increased interest rates because of the industry's capital intensive nature.

MID-CAP AND SMALL-CAP INVESTMENTS. Investing in the securities of mid-cap and small-cap companies generally involves greater risk than investing in larger, more established companies. This greater risk is, in part, attributable to the fact that the securities of mid-cap and small-cap companies usually have more limited marketability. Because mid-cap and small-cap companies have fewer shares outstanding than larger companies, it also may be more difficult to buy or sell significant amounts of such shares without unfavorable impact on prevailing prices. Additionally, securities of mid-cap and small-cap companies are typically subject to greater changes in earnings and business prospects than are larger, more established companies and typically there is less publicly available information concerning mid-cap and small-cap companies than for larger, more established companies. Although investing in securities of mid-cap and small-cap companies offers potential above-average returns if the companies are successful, there is a risk that the companies will not succeed and the prices of the companies' shares could significantly decline in value.

Securities of mid-cap and small-cap companies, especially those whose business involves emerging products or concepts, may be more volatile due to their limited product lines, markets or financial resources and may lack management depth. Securities of mid-cap and small-cap companies also may be more volatile than larger companies or the market averages in general because of their general susceptibility to economic downturns, especially in the financial services group of industries where changes in interest rates and demand for financial services are so closely tied to the economy.

FOREIGN INVESTMENTS. The Funds' investments may include foreign securities, including indirect investments such as ADRs or other types of depositary receipts, which are U.S. dollar-denominated receipts representing shares of foreign-based corporations. Investing in foreign securities presents unique investment risks. The value of securities denominated in or indexed to foreign currencies, and of dividends and interest from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets, and prices on some foreign markets can be highly volatile. Many foreign countries lack uniform accounting and disclosure standards comparable to those applicable to U.S. companies, and it may be more difficult to obtain reliable information regarding an issuer's financial condition and operations. In addition, the costs of foreign investing, including withholding taxes, brokerage commissions, and custodial costs, are generally higher than for U.S. investments.

NON-DIVERSIFICATION. The Funds, except the Gas Utility Index Fund, are classified as “non-diversified” investment companies under the Investment Company Act of 1940, as amended (the “1940 Act”), which means each Fund may own larger positions in a smaller number of securities. A fund that is less diversified may be more susceptible to adverse economic, political, or regulatory developments affecting a single issuer than a fund that is more broadly diversified. However, each Fund intends to continue to qualify for treatment as a regulated investment company under the Internal Revenue Code of 1986, as amended, which requires that, among other things, at the close of each quarter of each Fund’s taxable year, a Fund may not (1) with respect to 50% of its total assets, invest more than 5% of its total assets in the securities of any one issuer or own more than 10% of outstanding voting securities of any one issuer, or (2) invest more than 25% of the value of its total assets in the securities of any one issuer. These limits do not apply to U.S. Government securities or securities of other registered investment companies.

INVESTMENTS IN DERIVATIVES. Each Fund, except the Gas Utility Index Fund, may engage in derivative instruments such as options, futures and forward foreign currency exchange contracts. Derivative instruments are instruments that derive their value from a different underlying security, index or financial indicator. A Fund may use derivatives for either hedging or non-hedging purposes, or for both purposes, including for purposes of enhancing return. Investing for non-hedging purposes may be considered speculative and involve additional risks.

The use of derivative instruments exposes a Fund to additional risks and transaction costs. Risks inherent in the use of derivative instruments include:

- the risk that interest rates, securities prices and currency markets will not move in the direction that a portfolio manager anticipates;
- imperfect correlation between the price of derivative instruments and movements in the prices of the securities, interest rates or currencies being hedged;
- the fact that skills needed to use these strategies are different than those needed to select portfolio securities;
- the possible absence of a liquid secondary market for any particular instrument and possible exchange-imposed price fluctuation limits, either of which may make it difficult or impossible to close out a position when desired;
- leverage risk, that is, the risk that adverse price movements in an instrument can result in a loss substantially greater than the Fund’s initial investment in that instrument; and

- particularly in the case of privately-negotiated instruments, the risk that the counter-party will not perform its obligations, which could leave the Fund worse off than if it had not entered into the position.

OTHER CONSIDERATIONS. If a Fund cannot be operated in an economically viable manner, it may cease operations, which could require shareholders to transfer their investment at an inopportune time.

The Statement of Additional Information (“SAI”) contains more information about the Funds’ investment strategies and related risks (see the heading “Additional Information” on the back cover).

PERFORMANCE OF THE FUNDS

The bar charts and tables that follow provide some indication of the risk of an investment in the Funds. The bar charts show the Funds’ performance for each calendar year since their inception or the last ten calendar years. The tables show how each Fund’s average annual total returns for different calendar periods over the life of the Fund or the last ten calendar periods of the Fund, both before and after taxes, compared to those of a broad-based securities market index and to an index of the average performance of comparable funds as compiled by a recognized mutual fund rating company. Returns shown assume reinvestment of dividends and distributions.

The after-tax returns shown were calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown. If you hold your Fund shares through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account, the after-tax returns are not relevant.

Please note that each Fund’s past performance, before and after taxes, is not necessarily an indication of how each Fund will perform in the future.

The figures shown for each Fund include information from the periods covered by such Fund’s corresponding predecessor prior to the reorganization of the Funds as series of The FBR Funds on February 27, 2004. Please see the SAI for more information.

The Pegasus Mid Cap Fund and the Pegasus Small Cap Fund commenced operations on February 28, 2007; therefore, they do not yet have a full calendar year of performance.

FEES AND EXPENSES

This table describes the fees and estimated expenses that you may pay if you buy and hold shares of the Funds.

Shareholder Fees

(fees paid directly from your investment)

Maximum Sales Charge (Load) Imposed on Purchases	NONE
Maximum Deferred Sales Charge	NONE
Maximum Sales Charge (Load) Imposed on Reinvested Dividends	NONE
Redemption Fee (including exchanges)*	1.00%

* A redemption fee applies only to redemptions (including exchanges) of Fund shares made within 90 days of purchase. See “Frequent Trading Policy and Redemption Fee” for more information. In addition, we charge a \$10.00 wire fee for all redemption proceeds paid by federal wire made through the Funds’ transfer agent, except on certain institutional and broker/dealer accounts.

Annual Fund Operating Expenses

(expenses that are deducted from Fund assets)

	Pegasus Fund	Pegasus Mid Cap Fund	Pegasus Small Cap Fund	Pegasus Small Cap Growth Fund
Advisory Fees	0.90%	0.90%	0.90%	0.90%
Distribution (12b-1) Fees	0.25%	0.25%	0.25%	0.25%
Other Expenses ¹	1.06%	3.02%	2.62%	2.66%

	Fund	Fund	Fund	Fund	Fund
Advisory Fees	0.90%	0.90%	0.90%	0.90%	0.40%
Distribution (12b-1) Fees	0.25%	0.25%	0.25%	0.25%	NA
Other Expenses ¹	<u>0.25%</u>	<u>0.77%</u>	<u>0.36%</u>	<u>0.55%</u>	<u>0.35%</u>
Total Annual Fund Operating Expenses	<u>1.40%</u>	<u>1.92%</u>	<u>1.51%</u>	<u>1.70%</u>	<u>0.75%</u>
Fee Waiver and Expense Reimbursement ²	—	(0.03)%	—	—	—
NET EXPENSES ²	<u>1.40%</u>	<u>1.89%</u>	<u>1.51%</u>	<u>1.70%</u>	<u>0.75%</u>

¹ Other expenses are based on amounts for the Fund's current fiscal year and include fees paid to intermediaries such as banks, broker-dealers, financial advisors or other financial institutions for administration, sub-transfer agency and other services associated with shareholders whose shares are held of record in omnibus accounts or other types of group accounts. For more information regarding administrative fees, see the following section entitled "Fund Management." Other expenses may fluctuate from year to year based on Fund's investment operations and asset size.

² FBR Fund Advisers, Inc. has agreed in writing to waive a portion of its investment advisory fees and assume certain expenses of each Fund to the extent annual fund operating expenses exceed 1.95% of each Fund's average daily net assets (excluding interest, taxes, brokerage commissions, extraordinary legal expenses, or any other extraordinary expenses), except the Gas Utility Index Fund. With respect to the Gas Utility Index Fund, the Adviser has agreed in writing to waive a portion of its investment advisory fees and assume certain expenses of the Fund to the extent annual fund operating expenses exceed 0.85% of the Fund's average daily net assets (excluding interest, taxes, brokerage commissions, extraordinary legal expenses, or any other extraordinary expenses). The Adviser has agreed to maintain these expense limitations with regard to each Fund through November 1, 2008.

Examples

These Examples are intended to help you compare the cost of investing in the Funds with the cost of investing in other mutual funds.

These Examples assume that you invest \$10,000 in each Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year and that the

Funds' operating expenses remain the same.** Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Pegasus Fund	\$200	\$668	\$1,163	\$2,525
Pegasus Mid Cap Fund	198	1,065	1,946	4,213
Pegasus Small Cap Fund	198	985	1,791	3,894
Pegasus Small Cap Growth Fund.....	198	993	1,806	3,927
Focus Fund	143	443	766	1,680
Large Cap Financial Fund	192	600	1,034	2,241
Small Cap Financial Fund	154	477	824	1,802
Technology Fund	173	536	923	2,009
Gas Utility Index Fund	77	240	417	930

** The examples above assume that the expense limitation agreement will continue only through November 1, 2008, the end of its current term.

FUND MANAGEMENT

Investment Adviser

FBR Fund Advisers, Inc. (the "Adviser"), located at 1001 Nineteenth Street North, Arlington, Virginia 22209, serves as the investment adviser to the Funds. The Adviser directs the investment of each Fund's assets, subject at all times to the supervision of the Board of Trustees ("Board") of The FBR Funds (the "Trust"). The Adviser continually conducts investment research and supervision for the Funds and is responsible for the purchase and sale of each Fund's investments with the exception of the Focus Fund for which it has retained a sub-adviser. The Adviser was organized as a Delaware corporation in 1996 and is registered with the Securities and Exchange Commission ("SEC") as an investment adviser. As of January 31, 2008, it managed approximately \$1.9 billion of net assets on behalf of the Funds. The Adviser is a subsidiary of FBR Capital Markets Holding Group, Inc., a subsidiary of FBR Group, Inc. The Adviser and its asset management affiliates manage approximately \$2.5 billion of gross assets (including leverage) for numerous clients including individuals, banks and thrift institutions, investment companies, pension and profit sharing plans and trusts, estates and charitable organizations, and private partnerships.

Pursuant to an Investment Advisory Agreement with the Trust, for its services to the Trust, the Adviser is entitled to receive a monthly fee, at an annual rate of 0.90% of the average daily net assets of the Pegasus Fund, the Pegasus Mid Cap Fund, the Pegasus Small Cap Fund, the Pegasus Small Cap Growth Fund, the Focus Fund, the Large Cap Financial Fund, the Small Cap Financial Fund and the

Technology Fund and at an annual rate of 0.40% of the average daily net assets of the Gas Utility Index Fund. The Adviser may periodically waive all or a portion of its advisory fee with respect to each Fund. For the past fiscal year ended October 31, 2007, the Pegasus Fund, the Pegasus Mid Cap Fund, the Pegasus Small Cap Fund, the Pegasus Small Cap Growth Fund, the Focus Fund, the Large Cap Financial Fund, the Small Cap Financial Fund, the Technology Fund and the Gas Utility Index Fund paid advisory fees, after waiver or reimbursement, at the rate of 0.66%, 0.00%, 0.00%, 0.00%, 0.90%, 0.86%, 0.90%, 0.90% and 0.40%, respectively.

Information regarding the basis for the Board's approval of the Funds' investment advisory and sub-advisory agreements is available in the Funds' annual shareholder report for the fiscal year ended October 31, 2007.

Administrator

JPMorgan Chase Bank N.A. ("JPMorgan") serves as the administrator to the Funds and provides pursuant to an Administration Agreement ("Agreement") day-to-day administrative services including monitoring portfolio compliance, determining compliance with provisions of the Internal Revenue Code and preparing the Funds' registration statements. Pursuant to the Agreement, JPMorgan receives a fee of 0.02% of the first \$2.5 billion of average daily net assets of the Trust, 0.0175% of the next \$2.5 billion of average daily net assets of the Trust and 0.015% of the Trust's average daily net assets in excess of \$5 billion.

Pursuant to the Administrative Services Agreement, the Adviser also provides administrative services to the Funds including oversight of service providers. The Adviser receives 0.02% of average daily net assets of the Trust. The Adviser also provides the Funds with office space, facilities and business equipment and generally administers the Funds' business affairs and provides the services of executive and clerical personnel for administering the affairs of the Funds. The Adviser compensates all personnel, Officers, and Trustees of the Funds if such persons are employees of the Adviser.

Sub Adviser

Pursuant to an investment sub-advisory agreement, the Adviser retains Akre Capital Management, LLC ("ACM"), located at 2 West Marshall Street, Middleburg, Virginia 20118, as investment sub-adviser to the Focus Fund. In this capacity, subject to the supervision of the Adviser and the Board, ACM directs the investment of the Focus Fund's assets, continually conducts investment research and supervision for the Focus Fund, and is responsible for the purchase and sale of

the Focus Fund's investments. For these services, the Adviser (and not the Fund) pays ACM a fee from the Adviser's advisory fee.

ACM was organized as a Virginia limited liability company in 1999 and is registered with the SEC as an investment adviser. As of January 31, 2008, ACM managed approximately \$1.7 billion on behalf of the Focus Fund and other advisory clients such as high net worth individuals, institutions and private partnerships.

Portfolio Managers

The following section provides biographical information about each of the Funds' portfolio managers. With respect to each Fund, except the Focus Fund, the Adviser employs the portfolio managers responsible for managing each Fund's investments. ACM employs the portfolio manager responsible for managing the Focus Fund's investments. Where a Fund is managed by co-portfolio managers, such management is conducted with research, stock selection, portfolio composition and day to day trading decisions distributed equally amongst the investment professionals of the Adviser. Additional information regarding the portfolio managers' compensation, other accounts managed by these portfolio managers and their ownership of shares of the Funds each manages is available in the SAI.

David H. Ellison serves as President of the Trust and Chief Investment Officer (CIO) for the Funds. Mr. Ellison has served as portfolio manager of the Financial Funds since the commencement of operations, and co-portfolio manager of the Technology Fund since the commencement of operations. Prior to joining the Adviser as a portfolio manager in 1997, Mr. Ellison was portfolio manager of the Fidelity Select Home Finance Fund from 1985 until December 1996.

Charles T. Akre, Jr. has served as the portfolio manager of the Focus Fund since its commencement of operations. Mr. Akre is the managing member of ACM, the Fund's sub-adviser. Prior to June 1, 2000, Mr. Akre served as the portfolio manager of the Focus Fund and as a Managing Director of, or independent contractor to, the Adviser.

Winsor H. Aylesworth has served as co-portfolio manager of the Technology Fund since the commencement of operations and has served as portfolio manager of the Gas Utility Index Fund since 2001. Mr. Aylesworth has been employed by the Adviser since 1998. He holds both an M.S. and MBA degree and previously was president of Grandview Advisers, Inc.

Robert C. Barringer has served as co-portfolio manager of the Pegasus Fund and portfolio manager of the Pegasus Small Cap Fund since their commencement of operations and as the portfolio manager of Pegasus Small Cap Growth Fund since July 2004. Mr. Barringer holds a B.A. and a MBA and has a CFA designation. Prior to joining the Adviser in May 2004, Mr. Barringer held positions as either an analyst or a co-portfolio manager with Citizens Funds since February 2001.

Ryan C. Kelley has served as co-portfolio manager of the Pegasus Fund and portfolio manager of the Pegasus Mid Cap Fund since their commencement of operations. Mr. Kelley holds a B.A. degree and is a CFA charterholder. Prior to joining the Adviser in 2005, Mr. Kelley held various positions at FBR, including senior equity analyst in the research department since 2002 and associate in corporate finance for five years prior to 2002.

INVESTING IN THE FUNDS

All purchases and redemptions of a Fund's shares are made at the Fund's net asset value per share ("NAV") next determined after receipt of the order in proper form. You pay no sales charges to invest in the Funds.

DETERMINATION OF NET ASSET VALUE

Your price for Fund shares is the Fund's NAV, which is computed daily as of the close of regular trading on the NYSE (normally 4:00 p.m., Eastern time) on each day that the NYSE is open (a "Business Day"). Purchase orders received by JPMorgan Chase Bank, N.A. ("JPMorgan" or "Transfer Agent") prior to the close of regular trading on the NYSE on any Business Day, are priced according to the applicable NAV determined on that date. Purchase orders received after the close of regular trading on the NYSE are generally priced as of the time the Fund's NAV is next determined.

Each Fund determines its NAV by dividing the value of its net assets (i.e., assets less liabilities) by the total number of shares then outstanding. Each Fund's investments are valued based on market value. When a market quotation for a security is not readily available (which may include closing prices deemed to be unreliable because of the occurrence of a subsequent event), such security will be priced using its fair value as determined in good faith, by, or using procedures approved by, the Board of Trustees of the Funds. The types of securities for which such fair value pricing may be required include, but are not limited to: foreign securities affected by a significant event occurring after the close of the foreign market on which such security principally trades, but before the close of the NYSE, that is likely to have changed the value of the security; securities whose trading has been halted or suspended; and securities that are restricted as to transfer or resale.

Valuing securities at fair value involves greater reliance on judgment than valuing securities that have readily available market quotations. There can be no assurance that a Fund could obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Fund determines its net asset value per share.

HOW TO BUY SHARES

General

You may buy shares of the Funds on any Business Day. The minimum initial investment is \$2,000. For an investment in an IRA or pension, profit-sharing or other employee benefit plan (“Retirement Plans”) the minimum initial investment is \$1,000. There is no minimum requirement for subsequent investments. The Funds reserve the right to reject any purchase order or change the initial and subsequent investment minimum requirements at any time.

Important Information About Procedures For Opening A New Account

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account, and to determine whether such person’s name appears on government lists of known or suspected terrorists and terrorist organizations.

What this means for you: when you open an account, a Fund must obtain the following information:

- *Your name;*
- *Physical residential address (although post office boxes are still permitted for mailing);*
- *Date of birth; and*
- *Social security number, taxpayer identification number, or other identifying number.*

We may also ask for other information that will allow us to identify you or to see certain identifying documents. In addition, it may be necessary to verify your identity by cross-referencing your identification information with a consumer report or other third-party services. Additional information may be required to open accounts for corporations and other non-natural persons.

Federal law prohibits the Funds from establishing new accounts unless it receives the minimum identifying information listed above. The Funds also may be required to close your account if it is unable to verify your identity within a reasonable time.

Buying Shares Through the Distributor, Other Authorized Broker-Dealers or Investment Professionals

FBR Investment Services, Inc. (“FBR Services” or the “Distributor”) has relationships with certain brokers and other financial intermediaries who are authorized to accept, or designate intermediaries to accept, purchase and redemption orders for the Funds (the “Authorized Broker-Dealer”). If you purchase through such a broker, your order will be priced at the NAV next determined after your broker or its designated intermediary accepts it. Contact your broker to determine whether it has an established relationship with the Distributor.

To buy shares through the Distributor or an Authorized Broker-Dealer, you may send a check, or wire Federal Funds. The Distributor or an investor’s Authorized Broker-Dealer is responsible for forwarding purchase information and payment promptly to the Funds.

Shareholders whose shares are held through a brokerage account who desire to transfer such shares to another brokerage account should contact their current broker to affect the transfer.

Some broker-dealers (other than the Distributor), financial institutions, securities dealers, financial planners and other industry professionals (collectively, “Investment Professionals”) may charge their clients direct fees or impose conditions on investments in addition to or different from those described in this Prospectus. You should contact your Investment Professional concerning these fees and conditions (if any). Investment Professionals are solely responsible for promptly transmitting purchase and redemption orders to the Funds.

Distribution and Shareholder Servicing Arrangements. With respect to the Gas Utility Index Fund, the Adviser or its affiliates, from their own resources and without additional cost to the Fund or its shareholders, may provide additional cash payments to broker-dealers or other financial intermediaries as compensation for providing shareholder servicing and other administrative services to Fund shareholders. The Board of Trustees periodically reviews these payments.

Buying Shares Through the Transfer Agent

To purchase shares through the Transfer Agent, you should complete the application (the “Account Application”) accompanying this Prospectus and forward it with payment by check drawn on a U.S. or Canadian bank to The FBR Funds, c/o JPMorgan Chase Bank, N.A., P.O. Box 5354, Cincinnati, Ohio 45201-5354, or by overnight mail to The FBR Funds, c/o JPMorgan Chase Bank, N.A., 303 Broadway, Suite 900, Cincinnati, Ohio 45202-4203. You may make additional purchases of shares by mailing a check drawn on a U.S. or Canadian bank to the same address. If you pay for shares by check, the shares will be priced at the net asset

value next determined after the Transfer Agent receives the check in proper form. No cash, money orders, traveler's checks, credit card checks, future or post-dated checks including stale-dated checks, counter or starter checks will be accepted. The Funds may accept cashier's checks or official checks for the purpose of a transfer or rollover. In some instances, the Funds will accept third party checks, however, to protect against check fraud, the Funds may reject any purchase request involving a check that is not made payable to "The FBR Funds" (including, but not limited to, requests to purchase shares using third-party checks). The availability of funds purchased by check may be subject to a hold up to 10 business days.

If your check does not clear, for any reason, the Transfer Agent will cancel your purchase and charge you for any loss to the Fund. You may also be prohibited from future purchases.

You may also purchase shares by federal wire. Call the Transfer Agent at 888.888.0025 prior to sending the wire to ensure you use the correct wiring instructions. There is no charge from the Funds to make a wire purchase, however your bank may charge a fee for handling wire transfers. All wires must be denominated in U.S. Dollars.

You should also notify the Transfer Agent before wiring funds for additional purchases.

The Transfer Agent will not process purchases or redemptions until it receives a fully completed and signed Account Application.

In-Kind Purchases

You may buy shares of the Funds "in-kind" through a transfer of securities as payment for the shares, if approved in advance by the Adviser. Securities used to purchase Fund shares must be appropriate investments for that Fund, must be consistent with the Fund's investment objective and policies, and must have readily available market quotations. The securities will be valued in accordance with the Funds' procedures for valuing portfolio securities, determined as of the close of business the day on which the securities are received by the Fund in salable form. Whether a Fund will accept particular securities as payment will be decided at the sole discretion of the Adviser. If you are considering buying shares in this manner, please call 888.888.0025.

Systematic Investment Program

The Systematic Investment Program allows you to buy shares of a Fund at regular intervals. If your bank or other financial institution allows automatic withdrawals, you may buy shares by having a designated account debited in the specified amount every month or quarter, on the fifth and/or twentieth day of the month. A minimum initial investment of \$500 is required to enroll in the Systematic

Investment Program, and a \$50 minimum for all subsequent systematic investments. Only an account maintained at a domestic financial institution which is an Automated Clearing House member may be used for participation in the Systematic Investment Program. If you want to participate in the Systematic Investment Program, please call the Transfer Agent at 888.888.0025 to obtain the appropriate forms.

The Systematic Investment Program does not assure a profit and does not protect against loss in declining markets. The Funds may modify or terminate the Systematic Investment Program at any time or charge a service fee. No fee is currently charged or contemplated.

HOW TO REDEEM SHARES

General

You may redeem (sell) your shares on any Business Day. The price you will receive for your shares will be the NAV next determined after your order is received in proper form.

Normally, redemption proceeds will be mailed by the next Business Day after the Fund receives a redemption request in proper form, but it may take up to seven days to pay the redemption proceeds if making immediate payment would adversely affect a Fund. This generally applies to cases of very large redemptions or during unusual market conditions.

Notwithstanding the foregoing, with respect to redemption of shares that were purchased recently by check, the Funds may withhold payment of redemption proceeds for up to 10 business days.

Your account may be redeemed after 60 days' written notice to you if your account's net asset value has fallen below \$1,000 due to redemptions. If you receive notice that your account will be redeemed, you may avoid the redemption by investing additional amounts in your account to bring the balance over \$1,000. You will not be required to redeem your account that has fallen below \$1,000 due to market fluctuations.

FREQUENT TRADING POLICY AND REDEMPTION FEE

The Funds are intended for long-term investors and not for those who wish to trade frequently in their shares. Frequent trading into and out of a Fund can have adverse consequences for the Fund and long-term shareholders. The Trust believes that frequent or excessive short-term trading activity by Fund shareholders may be detrimental to long-term shareholders because those activities may, among other things, (a) dilute the value of shares held by long-term shareholders, (b) cause the

Funds to maintain a larger cash position than each such Fund would otherwise need, (c) increase brokerage commissions and related costs and expenses (such as custody and administrative costs and expenses), and (d) incur additional tax liability. To protect against such activity, the Board of Trustees has adopted policies and procedures to curtail frequent or excessive short-term trading activity by Fund shareholders.

In accordance with this policy, if you redeem or exchange shares within 90 days of purchasing them, the Funds will charge a redemption fee of 1% of the amount redeemed. The 1% redemption fee on shares redeemed (including exchanges) within 90 days of purchase is deducted from the redemption proceeds, is payable to the applicable Fund and is intended to offset out-of-pocket administrative costs and portfolio transaction costs caused by short-term trading. To calculate the redemption fee, the Funds will use the “first-in, first-out” (FIFO) method to determine the holding period. Under this method, the date of the redemption will be compared with the earliest purchase date of shares held in the account. All shareholders are subject to this fee, whether you invest directly with the Funds or through a Financial Intermediary, except as noted below.

Subject to the advance approval of the Trust’s chief compliance officer, the redemption fee may be waived on certain exempt transactions and accounts, including (1) redemptions and exchanges of Fund shares acquired through the reinvestment of dividends and distributions; (2) redemptions initiated by the Fund, including payment of maintenance fees; (3) shares redeemed due to death or disability of a shareholder or divorce decree; (4) transfer of assets within the same Fund; (5) certain redemptions and exchanges from participant directed retirement plans (please see below); and (6) redemptions and exchanges redeemed through asset allocation programs, provided the rebalancing is done no more than quarterly. Under Rule 22c-2 of the Investment Company Act of 1940, the Funds have entered into agreements with financial intermediaries obligating such financial intermediaries to provide, upon each Fund’s request, certain information regarding their customers and their customers’ transactions in shares of the Funds. However, there can be no guarantee that all short-term trading activity will be detected in a timely manner, since the Funds will rely on the financial intermediaries to provide the trading information, and the Funds cannot be assured that the trading information, when received, will be in a form that can be quickly analyzed or evaluated by the Funds.

Redemption fees will not apply to the following transactions in participant directed retirement plans (such as 401k, 403b and 457 plans): (1) redemptions due to loans; (2) required minimum distributions; (3) plan or participant termination; and (4) redemptions and exchanges on initial payroll or employer contributions.

Other than the redemption fee, the Trust does not impose limits on the frequency of purchases and redemptions at the present time, nor does it limit the number of

exchanges in a given period, but reserves the right to impose such measures in the future. The Trust allows exchanges into any Fund in the Trust. The Trust reserves the right to modify, withdraw or impose certain limitations at any time with respect to the exchange privilege. The Trust reserves the right to modify the redemption fee to meet any regulatory requirements that may be imposed in the future.

Redeeming Through The Distributor, Authorized Broker-Dealers or Investment Professionals

If you hold Fund shares through a brokerage account, you must submit redemption requests to your account executive or Authorized Broker-Dealer, either in person, by telephone or by mail. As the Funds' agent, the Distributor or another Authorized Broker-Dealer may honor a redemption request by repurchasing Fund shares from you at the shares' NAV next computed after the Distributor or Authorized Broker-Dealer receives your request. Under normal circumstances, redemption proceeds will be paid by check or credited to your brokerage account by the next Business Day. The Distributor and Authorized Broker-Dealers are responsible for sending redemption requests promptly to the Transfer Agent. You may also place redemption requests through an Investment Professional, who may charge a fee for this service.

Redeeming Through The Transfer Agent

Some circumstances require that your request to sell shares be made in writing accompanied by an original signature guarantee to help protect against fraud. We accept original signature guarantees from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations participating in a Medallion program. The three recognized medallion programs are Securities Transfer Agent Medallion Program (STAMP), Stock Exchanges Medallion Program (SEMP), and New York Stock Exchange, Inc. Medallion Signature Program (MSP). SIGNATURE GUARANTEES RECEIVED FROM INSTITUTIONS NOT PARTICIPATING IN THESE PROGRAMS WILL NOT BE ACCEPTED.

Some of the circumstances that may require an original Medallion signature guarantee from one of the above programs include:

- Redemption proceeds that exceed \$100,000
- Proceeds that are not being paid to the owner of record, including the transfer of assets
- Proceeds that are being sent to an address other than the address of record
- Proceeds to be paid by check to an address of record that has been changed within 30 days

- Proceeds being sent via wire or ACH when bank instructions have been added or changed within 30 days of your redemption request.

We may require additional documentation of authority when a corporation, partnership, trust, fiduciary, executor or administrator requests a redemption. Contact the Transfer Agent for requirements.

REDEMPTION IN WRITING. If you do not hold shares through a brokerage account and you wish to redeem shares, you may redeem your shares through the Transfer Agent by sending a written request directly to: The FBR Funds, c/o JPMorgan Chase Bank, N.A., P.O. Box 5354, Cincinnati, Ohio 45201-5354. Include the following information in your redemption request:

- the name of the Fund and account number you are redeeming from;
- your name(s) and address as it appears on your account;
- the dollar amount or number of shares you wish to redeem;
- your signature(s) as it appears on your account registration; and
- a daytime telephone number.

REDEMPTION BY TELEPHONE/PAYMENT BY WIRE TRANSFER. You may redeem shares by telephone if you elected this option on your initial Account Application. If you wish to add this privilege to your account, please call the Transfer Agent at 888.888.0025 for instructions. Shares held in IRA accounts and qualified retirement plans cannot be sold by telephone.

If you redeem shares by telephone, we will mail a check for the redemption proceeds to your registered address unless you have designated in your Account Application that redemption proceeds are to be sent by wire transfer to a specific checking or savings account. In that case, if we receive a telephone redemption request before the close of regular trading on the NYSE (normally 4:00 p.m., Eastern time), we will wire the redemption proceeds to your bank account on the next day that a wire transfer can be effected. We charge a transaction fee of \$10.00 for payments by wire. This fee may be waived for certain institutional accounts and broker/dealer accounts. Your bank may also charge a fee for receiving the wire.

In order to protect your investment assets, the Funds will only follow instructions received by telephone that it reasonably believes to be genuine. However, there is no guarantee that the instructions relied upon will always be genuine and the Funds will not be liable, in those cases. The Funds have certain procedures to confirm that telephone instructions are genuine. Some of these procedures may include requiring personal identification; making checks payable only to the owner(s) of the account shown on the Funds' records; mailing checks only to the account address shown on the Funds' records; directing wires only to the bank account shown on the Funds'

records; providing written confirmation for transactions requested by telephone and tape recording instructions received by telephone. The Funds reserve the right to refuse any transaction they believe to not be genuine.

Redemption In-Kind

Redemption proceeds are normally paid in cash; however, the Funds reserve the right to pay the redemption price in whole or in part by a “redemption in-kind” of portfolio securities of the particular Fund, in lieu of cash, if the amount you are redeeming is large enough to affect Fund operations (for example, if it represents more than 1% of a Fund’s assets).

Automatic Withdrawal

The Funds have an automatic withdrawal program, which allows you to withdraw a specified dollar amount (minimum of \$100) on either a monthly or quarterly basis. You must have a minimum account balance of \$10,000 in a Fund to enroll in the automatic withdrawal program. We will redeem shares in your account for this purpose. As with other redemptions, we will charge a 1% fee for shares redeemed that have been held 90 days or less (see “Frequent Trading Policy and Redemption Fee”). You may obtain an application for automatic withdrawal from the Distributor or the Transfer Agent. If, as a result of your automatic withdrawals, your account balance in a Fund falls below \$1,000, it may be subject to the minimum account balance requirements. You may cancel the automatic withdrawal at any time. The Funds reserve the right to cancel the plan if, on two or more consecutive months, there has been insufficient shares in your account. The Funds may modify or terminate the automatic withdrawal program at any time.

SHAREHOLDER SERVICES

Tax-Sheltered Retirement Plans

You may invest in each Fund through various retirement plans. These include individual retirement plans and employer sponsored retirement plans, such as defined benefit and defined contribution plans. To determine which type of retirement plan is appropriate for you, please contact your tax adviser. For further information about Fund sponsored Traditional, Roth and SEP IRA plans, please call the Transfer Agent.

Exchange Privilege

You may exchange your shares of a Fund for shares of another Fund described in this Prospectus or for shares of the FBR Fund for Government Investors, a money market fund.

You should obtain and read the current Prospectus of the FBR Fund you want to acquire in an exchange by calling 888.888.0025. Please note that proceeds of shares exchanged within 90 days of purchase will be subject to a 1% redemption fee (see “Frequent Trading Policy and Redemption Fee”). The FBR Fund you are exchanging into must be available for sale in your state and the registration for both accounts must be identical. Exchanges will be effected at the respective net asset values of the Funds involved as next determined after receipt of the exchange request. The exchange privilege may be modified or withdrawn at any time and is subject to certain limitations.

If you wish to make an exchange, you may do so by sending a written request to the Transfer Agent. You will automatically be provided with telephone exchange privileges when you open your account, unless you indicate on the Account Application that you do not wish to use this privilege. You may add a telephone exchange feature to an existing account that previously did not provide for this option. If you wish to add this privilege to your account, please call the Transfer Agent at 888.888.0025 for instructions. Once this election has been made, you may simply contact the Transfer Agent at 888.888.0025 to request the exchange.

When you enact an exchange, a new account will be established with the exact registration and options as the account you are exchanging from unless you are exchanging into an existing account. If you want different options for the new account, you must specify this in writing, with all signatures guaranteed as described above. See “Redeeming Through the Transfer Agent.”

For federal income tax purposes, an exchange is treated as a redemption of the shares surrendered in the exchange, on which you may be subject to tax, followed by a purchase of shares received in the exchange (except for exchanges within retirement plans). You should consult your own tax adviser concerning the tax consequences of an exchange.

If an exchange is to a new account in a Fund, the dollar value of shares acquired must meet the Fund’s minimum investment for a new account. Any amount that remains in a Fund account after an exchange must not drop below the minimum account value required by the Funds.

OTHER IMPORTANT INVESTMENT INFORMATION

Distribution Fees

Each Fund, except the Gas Utility Index Fund, has adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act which allows the Fund to pay distribution fees for the sale and distribution of its shares. Under these plans, each Fund pays a

distribution fee at an annual rate of up to 0.25% of the Fund's average daily net assets. Because these fees are paid out of the Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Dividends and Distributions

Each Fund, except the Gas Utility Index Fund, declares and pays any dividends from its net investment income, if any, annually. The Gas Utility Index Fund declares and pays any such dividends quarterly. The Funds distribute substantially all of their net capital gain (the excess of net long-term capital gain over net short-term capital loss) and net short-term capital gain, if any, after the end of the taxable year in which the gain is realized. The Funds may make additional distributions if necessary to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code").

You may choose to have dividends and distributions of a Fund paid to you in cash or additional shares of the Fund. You should make this election on your Account Application but you may change your election by giving written notice to the Transfer Agent at any time prior to the record date for a particular dividend or distribution. If you do not choose otherwise, all dividends and distributions will be reinvested in the Fund paying the dividend and/or distribution.

If you elect to receive dividends and distributions in cash and the payment (1) is returned and marked as "undeliverable" or (2) remains uncashed for six months, your cash election will be changed automatically and future dividends will be reinvested in the Funds at the NAV determined as of the date of payment. In addition, any undeliverable checks or checks that remain uncashed for six months will be canceled and then reinvested in the Funds at the NAV determined as of the date of cancellation.

Federal Tax Considerations

Investments in the Funds have tax consequences that you should consider. This section briefly describes some of the more common federal tax consequences. A more detailed discussion about the tax treatment of distributions from a Fund and about other potential tax liabilities, including backup withholding for certain taxpayers and tax aspects of dispositions of shares of a Fund, is contained in the SAI. You should consult your tax adviser about your own particular tax situation.

Taxes on Distributions

You will generally have to pay federal income tax on all Fund distributions. Distributions will be taxed in the same manner whether you receive the distributions

in cash or in additional shares of a Fund. Shareholders who are not subject to tax on their income generally will not be required to pay any tax on distributions.

Distributions that are derived from net long-term capital gains generally will be taxed as long-term capital gains. Dividend distributions and short-term capital gains generally will be taxed as ordinary income. The tax you pay on a given capital gains distribution generally depends on how long a Fund held the portfolio securities it sold. It does not depend on how long you held your Fund shares.

Currently applicable tax provisions generally provide for a maximum tax rate for individual taxpayers of 15% on long-term gains and from certain qualifying dividends on corporate stock. These rate reductions do not apply to corporate taxpayers or to foreign shareholders. The following are guidelines for how certain distributions by a Fund are generally taxed to individual taxpayers:

- Distributions of earnings from qualifying dividends and qualifying long-term capital gains will be taxed at a maximum rate of 15%.
- Note that distributions of earnings from dividends paid by certain “qualified foreign corporations” can also qualify for the lower tax rates on qualifying dividends.
- A shareholder will also have to satisfy a more than 60-day holding period with respect to any distributions of qualifying dividends in order to obtain the benefit of the lower tax rate.
- Distributions of earnings from non-qualifying dividends income, interest income, other types of ordinary income and short-term capital gains will be taxed at the ordinary income tax rate applicable to the taxpayer.
- The favorable treatment for qualifying dividends and the maximum 15% rate on capital gains for individual taxpayers is currently scheduled to expire in 2010.

Distributions are generally taxable to you in the tax year in which they are paid, with one exception: distributions declared in October, November or December, but not paid until January of the following year, are taxed as though they were paid on December 31 in the year in which they were declared.

Shareholders generally are required to report all Fund distributions on their federal income tax returns. Each year the Funds will send you information detailing the amount of ordinary income and capital gains paid to you for the previous year.

The Funds may be required to withhold U.S. federal income tax at the rate of 28% of all taxable distributions payable to you if you fail to provide the Funds with your correct taxpayer identification number or to make required certifications, or if you

have been notified by the IRS that you are subject to backup withholding. Such withholding is not an additional tax and any amounts withheld may be credited against your U.S. federal income tax liability.

Taxes on Sales or Exchanges

If you sell shares of a Fund or exchange them for shares of another Fund, you generally will be subject to tax on any taxable gain. Taxable gain is computed by subtracting your tax basis in the shares from the redemption proceeds (in the case of a sale) or the value of the shares received (in the case of an exchange). Because your tax basis depends on the original purchase price and on the price at which any dividends may have been reinvested, you should be sure to keep account statements so that you or your tax preparer will be able to determine whether a sale will result in a taxable gain. If your tax basis in the shares exceeds your redemption proceeds, you will recognize a taxable loss on the sale of the shares of the Fund.

Other Considerations

If you buy shares of a Fund just before the Fund makes any distribution, you will pay the full price for the shares and then receive back a portion of the money you have just invested in the form of a taxable distribution.

Disclosure of Portfolio Holdings

A complete list of each Fund's portfolio holdings is publicly available on a quarterly basis on the Funds' website at www.fbrfunds.com by the 10th business day following the end of each calendar quarter. A complete list of the Funds' portfolio holdings is also publicly available through filings made with the U.S. Securities and Exchange Commission on Forms N-CSR and N-Q. The Funds also make available certain additional information regarding their portfolios (e.g. top-10 holdings, asset allocation, sector breakdown) on their website on a quarterly basis by the 15th of the month following the calendar quarter-end. A description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolios is provided in the Funds' SAI.

Payments to Third Parties by the Adviser and its Affiliates

The Adviser and its affiliates, including the Distributor, may, out of their own resources, and without additional direct cost to the Funds or their shareholders, provide compensation to certain financial intermediaries, such as broker-dealers and financial advisers, in connection with sales of shares of the Funds. This compensation is in addition to any Distribution (Rule 12b-1) Fees paid by the Funds to such intermediaries. This compensation is generally made to those intermediaries that provide shareholder servicing, marketing support, broker education, and/or

access to sales meetings, sales representatives and management representatives of the intermediary. Compensation may also be paid to intermediaries for inclusion of the Funds on a sales list, including a preferred or select sales list, in other sales programs or as an expense reimbursement in cases where the intermediary provides shareholder services to Fund shareholders.

Please be aware that the Funds may use brokers who sell shares of the Funds to effect portfolio transactions. The Funds do not consider the sale of Fund shares as a factor when selecting brokers to effect portfolio transactions. The Funds have adopted procedures which address these matters. You should note that if one mutual fund sponsor makes greater distribution assistance payments than another, your broker or financial adviser and his or her firm may have an incentive to recommend one fund complex over another.

FINANCIAL HIGHLIGHTS

The financial highlights tables on the following pages are intended to help you understand each Fund's financial performance for the past five years, or, if shorter, the period of the Fund's operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions, if any). The information for the periods ended March 31, 2003 and later for the Gas Utility Index Fund and for the periods ended October 31, 2003 and later for all other Funds has been audited by Tait, Weller & Baker LLP, whose report, along with the Funds' audited financial statements, are included in the current annual report, which is available upon request.

FBR Pegasus FundTM

For the Year Ended
October 31, 2007

For the Period Ended
October 31, 2006*

Per Share Operating Performance:

Net Asset Value — Beginning of Period	\$ 11.84	\$ 10.00
Income (Loss) from Investment Operations:		
Net Investment Loss ^(1,3)	(0.04)	(0.01)

Total Distributions	(0.45)	(0.00) ⁽²⁾
Paid-in Capital from Redemption Fees ⁽⁵⁾	(0.00) ⁽²⁾	0.01
Net Increase in Net Asset Value	1.56	1.84
Net Asset Value — End of Period	\$ 13.40	\$ 11.84
Total Investment Return ⁽⁶⁾	17.52%	18.45% ^(A)

Ratios to Average Net Assets:

Expenses After Waivers and Related Reimbursements ⁽³⁾	1.97%	1.94% ^(B)
Expenses Before Waivers and Related Reimbursements	2.21%	2.74% ^(B)
Net Investment Loss After Waivers and Related Reimbursements ⁽³⁾	(0.30)%	(0.23)% ^(B)
Net Investment Loss Before Waivers and Related Reimbursements	(0.54)%	(1.03)% ^(B)

Supplementary Data:

Portfolio Turnover Rate	108%	166% ^(A)
Net Assets at End of Period (in thousands)	\$13,037	\$13,349

* Represents the period from commencement of operations (November 15, 2005) through October 31, 2006.

¹ Calculated based on shares outstanding on the first and last day of the respective periods, except for dividends and distributions, if any, which are based on the actual shares outstanding on the dates of distributions.

² Less than \$0.01

³ Reflects fees waived and reimbursed by FBR Fund Advisers, Inc. pursuant to a contractual expense limitation of 1.95% (excluding interest, taxes, brokerage commissions, extraordinary legal expenses, or any other extraordinary expenses).

⁴ The amounts shown for a share outstanding throughout the period may not be in accordance with the changes in the aggregate gains and losses on investments during the period because of the timing of sales and repurchases of Fund shares in relation to fluctuating net asset values during the period.

⁵ Calculated based on average shares outstanding.

⁶ Total investment return is calculated assuming a purchase of shares on the first day and a sale on the last day of each period reported and will include reinvestment of dividends and distributions, if any.

By telephone: 888.888.0025

By mail: The FBR Funds
FBR Equity Funds
P.O. Box 5354
Cincinnati, OH 45201-5354

By e-mail: fbrfundsinfo@fbr.com

On the Internet: The materials may be read or downloaded on the Funds' website at www.fbrfunds.com.

In an effort to eliminate unnecessary duplication and reduce the cost to shareholders, the Funds will mail only one copy of the Prospectus or other shareholder reports to shareholders with the same mailing address. If you would prefer to receive a copy of the Prospectus or other shareholder reports for each shareholder at a mailing address, please contact the Funds at 888.888.0025.

Information about the Funds (including the Funds' Statement of Additional Information) can also be reviewed and copied at the Securities Exchange Commission's ("Commission") Public Reference Room in Washington, D.C. Information on the operation of the public reference room may be obtained by calling the Commission at 202.551.8090 or 800.SEC.0330. Reports and other information about the Fund are available on the Commission's Internet site at <http://www.sec.gov>, and copies of this information may be obtained, upon payment of a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov, or by writing the Public Reference Section of the Commission, Washington, D.C. 20549-0102.
